DESCRIPTION

See figure 1

Pos	Description
①	Cover
②	Lamp-holder board (traditional version)
③	Board with LEDs (LED version)
④	Cover base
⑤	Right slide
⑥	Left slide
⑦	Flashing lamp support
⑧	Cable runner
⑨	Antenna support
⑩	Antenna (optional)

INSTALLATION AND CONNECTIONS

⚠ Horizontal or upturned fixing (Fig. 2 ref. ④,⑤ and ⑥) is allowed only in covered areas, e.g. in buried boxes.

⚠ To maintain the protection class IP55 the flashing lamp must be installed on a flat surface. The flashing lamp support must rest evenly.

The flashing lamp can be installed in different positions (Fig. 2), depending on installation needs.

For installation proceed as follows:

1. Choose the installation position keeping in mind that:
 - a- It must be fixed vertically, except for covered areas (Fig. 2).
 - b- It must be visible from every direction
 - c- It must not be covered by trees, signs or other objects
 - d- It must be positioned in the immediate vicinity of the gate
2. Clear the necessary fixing holes, fig. 2.
3. Choose the cable passage areas (power supply and antenna, if used) among those shown in Fig. 3.

⚠ The position ① and ② refer to two pre-bored holes, which must be opened.

4. Insert the power cable (and the antenna cable, if used).
5. Fix the support using the wedges Ø5 (Fig. 4).
6. Clear a pre-bored hole at the base of the cover (Fig. 5 ref. ①).
7. Clear two holes on the cable runner (Fig. 5 ref. ②).

⚠ The cable runner is designed for wire passage only.

8. Insert the power cable and connect it to the board (Fig. 6).

⚠ To connect the antenna in the LED versions, refer to the paragraph "Installing the Antenna".

9. Fix the board inside the cover support.
10. Fix the cover support to the base of the flashing lamp (Fig. 7).
11. Position the antenna support (Fig. 8).
12. Install the flashing lamp cover (Fig. 9):
 - a- The logo on the cover can be placed in four different positions, separated by 90°.
 - b- Position the cover with the logo facing the desired position.
 - c- Turn slightly anti-clockwise until the cover enters its housing.

d- Turn clockwise until the cover locks in place.

⚠ On the base of the cover there is a locking tab (Fig. 10 ref. ①) which must couple with the opening made in the cover (Fig. 10 ref. ②).

13. Install the two front slides (Fig. 11).

INSTALLING THE ANTENNA

FLASHING LAMP GUARD

1. Clear the pre-bored holes, Ø9 (Fig. 12 ref. ① ②).
2. Install the antenna and the provided accessories (Fig. 12).
3. Insert the antenna cable separating it from the power supply cable.
4. Position the antenna support and then the cover.

⚠ The antenna support cannot be removed if the cover is installed.

LED GUARD FLASHING LAMP

The LED version is equipped with a built-in antenna. To connect it, proceed as follows:

1. Make a Ø 12.5 hole in the cover support (Fig. 13 ref. ①).
2. Install an M12x1.5 (or PG7) cable runner, not supplied, as shown in figure 13.
3. Insert the antenna cable and connect it to the dedicated terminals precisely as shown in figure 13.

⚠ To connect the antenna, use a coaxial cable RG58 (not supplied).

MAINTENANCE

REPLACING THE LIGHT BULB

1. Press the locking tab shown in fig. 14 and remove the cover by turning it anti-clockwise.
2. Replace the light bulb with a new one having the same specifications.
3. Refit the cover.

CE DECLARATION OF CONFORMITY

Manufacturer: GENIUS S.p.A. con Socio Unico

Address: Via Padre Elzi, 32 - 24.50 - Grassobbio - Bergamo - ITALY

Declares that: Flashing lamp mod. GUARD

conforms to the essential safety requirements of the following EEC directives:

- 2006/95/EC Low Voltage directive
- 2004/108/EC Electromagnetic Compatibility directive

Additional information:

This product underwent a test in a typical uniform configuration (all products manufactured by GENIUS S.p.A.)

Grassobbio, 28 June 2011
